WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Pawl: 12 mm pivot hole, nose radius 3, 150 from the drum axis at the pivot
Pawl stops the drum turning to pay out; flip it up to lower
Band 270 deg round the brake drum, lining bonded on, 6 mm thick in all
Anchor eye pinned between two posts behind the drum (the tight end when lowering)
Live end: 25 x 6 link on the tangent to an arm 60 above the lever pivot
Lever 650 long, 6 kg block at the end: brake on when let go
Check: lever lifts 30 mm to free the drum; 300 N m holding
