WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

- Crosshead plates 10 mm, 50 apart: hinge hole 30.5, axle hole 20.5 120 above
- Hinge pin 30 x 404, R-clips both ends; sheave on a 20 mm axle
- Tie rods 30 x 10, 420 between 20.5 and 25.5 holes; two per shell
- Dead end on one plate: stub, arm 45 deep and lug, hole 197 up, 130 aside
- Arm kept above 140 so the open shells clear it
- Shear link: two 6 mm plates 87 x 30, 16 mm pin at the bottom
- Calibrated link pin about 1.9 mm, 62 above the lug pin
- Check: crosshead turns on the pin; rods swing freely
